Project Proposal: Custom E-Commerce Platform with Customer Savings Wallet & Installment Tracking

Prepared for: Eucharia Enwemadu (on behalf of the client organization)
Prepared by: Daniel Nicholas
Date: October 15, 2026 · **Quotation valid for:** 30 days from the date above

1. Executive Summary

This proposal details the technical scope, phased development structure, professional fee, and third-party costs for a custom e-commerce web platform equipped with **customer savings wallets** and **automated installment (credit) payment tracking**, integrated with local payment processors (Paystack or Monnify).

Every monetary item in this document is assigned to exactly one of two owners so there is no ambiguity at any point:

1. The development fee — paid to the developer (Daniel Nicholas) for engineering the platform.
2. Third-party costs — paid directly by your organization to each provider (domain registrar, hosting, payment gateway, etc.), so your organization retains full ownership and administrative control of every digital asset.

2. Scope of Work and Phased Development Structure

Development is structured into **two milestones**, each independently valuable, testable, and separately paid, so that progress is always visible and risk is always shared.

Milestone 1 — E-Commerce Core & Storefront — ₦350,000

What your customers get	What your staff get
Professional storefront and product catalog	Core admin dashboard: products, orders, users
Secure customer registration and login	One bulk product import from your catalog file
Direct checkout via Paystack or Monnify	Order and payment status tracking

Delivery: 3–4 weeks from mobilization payment + confirmed prerequisites.

Milestone 2 — Financial Engine: Savings Wallet & Installment Tracking — ₦350,000

What your customers get	What your staff get
Savings wallet: save toward any purchase and watch progress	Wallet & ledger admin screens with full transaction history
Pay-by-installment purchases (weekly or monthly schedules)	Automated repayment tracking, status and reminders
Automatic payment reminders	Credit repayment monitoring and reporting

> **Architecture note.** Customer funds flow directly through the payment gateway to your organization's own settlement account. The system records and reconciles customer claims without holding pooled funds — intentionally keeping

> your operation outside the scope of CBN payment-servicing licensing for this use case.

Delivery: 2–3 weeks from acceptance of Milestone 1.

3. Investment

₦700,000

TOTAL DEVELOPMENT FEE
(PAYABLE TO THE DEVELOPER)

Milestone	Total fee	Mobilization (before work starts)	On delivery & acceptance
Milestone 1 — E-Commerce Core & Storefront	₦350,000	₦175,000	₦175,000
Milestone 2 — Savings Wallet & Installment Engine	₦350,000	₦175,000	₦175,000
Total development fee	**₦700,000**	**₦350,000**	**₦350,000**

Development on each milestone begins strictly upon receipt of its mobilization payment.

Third-party costs — paid directly by your organization

These are **not included in the development fee**. Each item is paid by you, in your name, so your organization owns the account and its master credentials. Where setup assistance is required, provisioning is executed strictly using your official company email.

Item	Purpose	Indicative cost (vendor pricing)
CAC business registration **(required)**	Gate for live Paystack/Monnify verification	₦15,000–₦120,000 one-off
Business bank account **(required)**	Gateway settlement account in the registered name	Free / min. balance per bank
Paystack or Monnify merchant account, live **(required)**	Customer payments and wallet funding	Free setup; ~1.5% + ₦100/transaction
Domain name	Platform address customers visit	~₦10,000–₦30,000 / year
Web hosting / cloud	Secure, always-on operation	~₦0–₦180,000 / year by scale
SSL certificate	Encrypted connections	Free — auto-issued
Official company email	Admin control, vendor sign-ups, OTP sender identity	~₦0–₦12,000 / user / month
Brand assets, product photos & data	Catalog content for launch	By your arrangement

Figures are indicative vendor prices for budgeting only and may change without notice; they are payable directly to each provider by the client.

4. Mandatory Prerequisites

1. **CAC business registration (required)** — gate for live payment gateway verification.
2. **Business bank account (required)** — settlement account in the registered entity's name.
3. **Verified merchant account (required)** — live API keys for Paystack or Monnify.
4. **Written credit policy (required)** — down-payment %, weekly vs monthly, grace period, penalties, interest.
5. **Product catalog data (required)** — CSV/Excel with cash prices and installment breakdowns.
6. **KYC decision (required)** — ID/BVN/guarantor rules before credit approval.
7. Domain & hosting — purchased or owned by your organization (setup assistance available on your corporate email).
8. Brand assets, website copy, terms of service and privacy policy documents.
9. Official company email.

5. Timeline & Delivery

- **Milestone 1:** 3–4 weeks from mobilization + prerequisites confirmation.
- **Milestone 2:** 2–3 weeks from Milestone 1 acceptance.

The schedule pauses automatically if a prerequisite remains outstanding and resumes within 3 business days of it being provided. Where possible, delivery is made ahead of schedule.

6. Scope Management & Acceptance

- Each milestone includes **two rounds of client review**; each review window is five business days. Silence after five business days counts as acceptance of that milestone.
- Business-rule changes raised mid-build (repayment schedules, penalties, interest, product flows) are **new scope**, quoted separately before implementation.

7. Optional Post-Launch Maintenance & Support Retainer

~~₦~~35,000 / month (optional) — covers uptime monitoring, security patching, monthly transaction-ledger health checks, and routine support with a one-business-day response commitment. Explicitly excludes new feature development (quoted separately as needed).

8. Acceptance

To proceed, confirm by reply email acceptance of the fee and milestone structure, and indicate your status against the Section 4 checklist. Work begins on receipt of the Milestone 1 mobilization payment.

Client name / Signature / Date

Quotation valid for 30 days from the date above.
